### THE SPRING WINDS AND RECYCLING

So far this year we have experienced some extreme winds, so please give thought as to how you put out your recycling. Take precautions that what you put in your recycling box STAYS in your recycling box. Loose newspapers and empty or light plastics tend to fly out into the ditches and tree lines, not to mention your neighbors! Not overfilling your box, and crushing your plastics will make them more compact and less likely to take flight. The simple act of putting a small piece of plywood or carpet on top of your recycled items will hold them down. An alternative would be to put your newspapers flat in a grocery bag then into your box; it holds a lot and they are contained. Or if your box is not too full, just keep it for the next pickup. Workers are not required to pick up strewn recycling whether from the wind or from overflowing. Please keep the environment and our workers in mind when recycling.

### DRIVE SLOW IN THE SNOW

- **BE NICE ON THE ICE:** Give yourself twice the space between vehicles and pedestrians. Stopping distance on ice is double that of a dry road
- **GO SLOW IN THE SNOW:** Slow down and drive according to weather conditions, not the speed limit
- **IT'S NOT A RACE, GIVE PLOW SPACE:** Snow plows are extra wide and can create clouds of snow – both of which reduce visibility and increase the risk of collision. It's best to wait for the plow to pull over before you pass.
